

SOS – *Superior Office Safety*

*Continuing Education Provider # 4967
Approved by the Dental Board of California*

CDA Recommended Speaker's Bureau

Federal & CAL/OSHA "Authorized Trainer"

Diane Arns, BS, holds a Bachelor's Degree in International Business from San Francisco State University and a Clear Professional Teaching Credential from California State University, Sacramento, with over 17 years of experience in education. Diane is an accredited CE Provider with the Dental Board of California, and since 2006 a member of the California Dental Association's "Recommended Speakers Bureau". In addition, Diane is also an "Authorized Trainer" for Federal & Cal-OSHA Outreach Training.

In 2001, Diane founded Superior Office Safety to create and present up-to-date, interactive, and relevant continuing education in topics required by the Dental Board of California and Cal/OSHA. Continuing Education courses specialize in the areas of Infection Control, California Dental Practice Act, Bloodborne Pathogens, Hazard Communication, and Injury and Illness Prevention Programs. Course descriptions attached.

In 2012, Diane created and implemented Sterilization and Infection Control Protocols and Management of Injuries Plans for CDA Cares Free Dental Clinics!

In addition to live interactive training, Diane specializes in thorough On-Site Hazard Assessment Consultative Services, needed to prepare a comprehensive Site-Specific Injury and Illness Prevention Plan. Using either CDA's Regulatory Compliance Manual (for CDA members) or Cal/OSHA's template, Diane will create an Injury and Illness Prevention Plan specific to your office, - integrating staff involvement with CAL/OSHA regulatory compliance guidelines to prepare, a site-specific program for YOUR dental practice. To complete the IIPP training requirement, Diane will provide training on each of the programs within your office for all staff on your Injury and Illness Prevention Plan. All participants will earn 4 CEUs of Core Continuing Education Units approved the Dental Board of California.

INFECTION CONTROL for License Renewal

It's in the Details!

2 Hour Program

Qualifies for 2 CE Credit – Core Course

Approved Provider by the

Dental Board of California

Federal OSHA & Cal/OSHA Outreach Trainer

This seminar combines information from CDC, OSAP, DBC and Cal/OSHA to provide a relevant, in depth and up-to-date examination of Infection Control guidelines and recommendations, for implementing and maintaining an effective Infection Control Program to prevent the spread of disease in any healthcare facility. This seminar meets the CE requirements specific to Amended CCR section 1005, the Dental Board of California Infection Control Regulations.

Infection Control concepts include policies, practices and products for:

- a) lowering the number of pathogens and ATDs,
- b) stopping the cycle of cross-contamination,
- c) “appropriate” PPE,
- d) disinfection of environmental and contact surfaces, dental waterlines and evacuation systems,
- e) sterilization guidelines and various levels of sterilization validation,

Templates for required In-Office protocols to coordinate In-Office Housekeeping, Sterilization, and Management of Injuries provided and reviewed.

CALIFORNIA DENTAL PRACTICE ACT

“The Many Hats in Dentistry”

2 Hour Program
Qualifies for 2 CE Credit – Core Course
Approved Provider by the
Dental Board of California
Federal OSHA & Cal/OSHA Outreach Trainer

This California Dental Practice Act seminar meets the new CE requirements for California Dental Practice Act education, including the new one-time course requirement for unlicensed dental assistants.

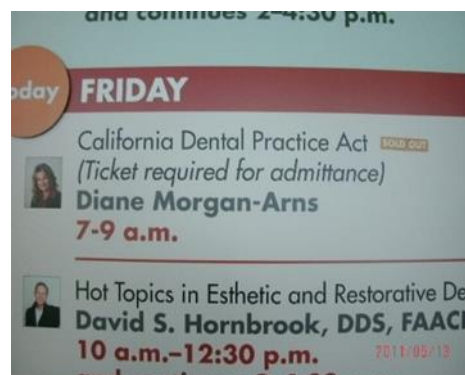

Course targets information and updates to the Dental Practice Act regulations, and other statutory mandates relating to the dental practice. This includes: Utilization and scope of practice for Dentists and Auxiliaries, Laws governing the prescribing of drugs, Requirements for the renewal of a license, Injury and Illness Prevention Plans, Mandated Reporters, Advertising guidelines, and citations, fines, revocation and suspension acts that are in violation of CDPA.

Annual Cal/OSHA Refresher Training

“Training for Action!!”

2-3 Hour Program

Qualifies for 2-3 CE Credits – Core Course

Approved Provider by the
Dental Board of California

Federal OSHA & Cal/OSHA Outreach Trainer

This comprehensive seminar is designed for Cal-OSHA’s ANNUAL “Refresher Training” requirements, and provides resources for In-Office education to all levels of dental professionals - DDS, RDH, RDA, DA, Lab technicians.

Because of the hazards inherent in the practice of dentistry, Cal/OSHA has specific training requirements to protect DHCPs from occupational risks. Annual training is required for all personnel in the dental office who have a risk of contracting a Bloodborne pathogen, and/or use hazardous chemicals or chemical waste, during the performance of their job. This training is required because all employees have “The Right to Know” and “The Right to Understand” hazards present in their workplace..

Proactive safety training topics include epidemiology of Bloodborne Pathogens and ATDs, current update of disease trends in the US, review of medical and chemicals and chemical waste with options for proper disposal. Dental waterline disinfection protocols and testing. Proposition 65 & EPA news and requirements.

Effective Dec 1, 2013, Cal/OSHA has new training requirements for all DHCPs under the Hazard Communications Standard, to train on a NEW Global Harmonizing Labeling System - GHS. Details of latest worldwide labeling system for all hazardous chemicals will be discussed with an in-office training guide provided.

Last but not least, Cal/OSHA requires every employer in the state of CA to implement and maintain an Injury and Illness Prevention Plan and provide Refresher Training on the plan at least annually or whenever changes occur. Basic components of IIPP and resources provided to facilitate In-Office safety programs – IIPP, and training specific to your office.

In-Office CAL/OSHA Training

INJURY AND ILLNESS PREVENTION PLAN WORKSHOP IN YOUR OFFICE

**3-4 Hour Program
3-4 CE Credits– Core Course
Approved Provider by the
Dental Board of California
Federal OSHA & Cal/OSHA Outreach Trainer**

CCR Title 8, Sec. 3203 states that all employers in the State of CA shall establish, implement, and maintain an effective Injury and Illness Prevention Program, performing hazard assessments, providing information and training for employees initially at hire, when changing job duties, or at a minimum annually.

A proactive response to create a safer workplace is the sole purpose for the IIPP requirement. Protecting all workers against the hazards in their workplace is paramount for the safety of all employees.

Beginning with a thorough on-site, room-by-room hazard assessment, Diane will create an Injury and Illness Prevention Plan for your office. Using either CDA's Regulatory Compliance Manual (for CDA members) or CAL/OSHA's template, Diane will create an Injury and Illness Prevention Plan for your office, integrating staff involvement with CAL/OSHA regulatory compliance guidelines to prepare, a site-specific IIPP for YOUR dental practice. To complete the IIPP training requirement, Diane will provide a thorough 3-4 hour training program for your dental team, at YOUR office, covering each of the required Plans within YOUR Injury and Illness Prevention Plan! All attendees will earn 4 CEUs approved by the Dental Board of California.

Take this proactive approach for the health & safety of all DHCPs in your office, and finally have an IIPP that is an effective training and communication tool, to reduce or totally eliminate opportunities for disease transmission and/or workplace injuries.

In-Office IIPP Training – New Safety Queen
